Summary

Dynamic and results-driven software development leader with over 15 years of experience in managing full-stack application development, modernizing legacy systems, and delivering enterprise-grade solutions. Proven ability to lead global teams, implement innovative technologies, and drive Agile software development lifecycles. Adept at aligning IT initiatives with business goals, reducing technical debt, and optimizing operational performance for scalability and reliability. Extensive Domain expertise in Presales Quote to Cash Systems, Point of Sale Systems, Customer Service Platforms and Ordering Workflow Management.

Education

Master of Science | Computer Science | University of Texas at Dallas

Bachelor of Engineering | Electronics and Communication | B.M.S. College of Engineering, India

Professional Experience

Verizon - Sr Director of Engineering | Service Assurance Systems | March'2024 – Dec' 2025

- **Provided architectural thought leadership** and developed multiyear roadmaps by collaborating across product teams, technology groups, and digital partnerships with Big Tech. Led initiatives to enhance scalability, resiliency, and latency of Verizon's core service systems, supporting the development of next-generation ideas and products to drive robust and scalable infrastructure for future growth.
- **AI Digital Agent Development:** Conceptualized and built next gen Event Ledger Platform to provide predictive insights over IVR based on past customer interactions leveraging distributed event collection across Digital and Assisted Touchpoint systems, GCP data stores, Google Dialog Flow and Google Gemini LLM Summarizations.
- **ServiceNow Transformation:** Served as an executive sponsor to drive rationalization of Legacy systems into ServiceNow in close partnership Product, ServiceNow, Google and HCL Tech.
- **Led a global team of 64 Employees** across comprising of Associate Directors, Managers and Developers, drive technical strategy and delivery, performance reviews, career development and make a significant impact on the technology landscape.
- **Enhanced customer and partner e-bonding API** strategies for improved system interoperability and reduced latency.
- **Fostered customer focused culture** with continuous learning and development, promoting best practices and innovative thinking.
- **Effective Budget Management** across employees and vendor contracts with often dynamic situational leadership to manage expenses.
- **Collaborate closely with a variety of stakeholders** (Upstream and Downstream Applications, Vendors, Product, Business & IT Leadership) to ensure cross-organizational dependencies were managed effectively.
- **Developed strategic plans** to accomplish technical as well as business objectives with leadership, dev teams and customers.
- **Represent the organization at the VP and SVP level** with Monthly Project Briefings & Quarterly Business Reviews.
- **Partner with engineering leadership across multiple teams**, ensuring strong collaboration and alignment among the teams
- Experience delivering products against plan in a fast-paced, multi-disciplined, distributed-responsibility and often ambiguous environment using data and metrics to back up assumptions, develop business cases and OKRs for the team.
- **Provide senior-level technical leadership and guidance to development** teams throughout the project lifecycle, from initial concept through implementation and support.
- Established software development standards, run & operate processes along with best practices for the entire organization.
- Participate in or lead troubleshooting and incident resolution of complex, high severity incidents.

Key Accomplishments:

- Ramped up a new engineering team from 20 to 64 employees globally within a year.
 - Achieved a 9% YoY reduction in call volumes through process automation and self-service enhancements.
 - Integrated ServiceNow Phase 1 within 6 months from concept, stakeholder acceptance, license procurement and execution.
 - Spanned 22 Use cases for AI Agents offering predictive insights across Order Delivery, Activation, Account Overview & Billing.
 - Delivered a 110% increase in team volunteering participation, showcasing strong employee engagement.
 - Achieved Highest Ratings on Team Pulse Surveys within the VP Organization.
-

Verizon - Director of Engineering | Wireless Point of Sale Systems | Aug'2022 – March'2024

- **Led a globally distributed software engineering team of 28 Employees** in US, Germany and India for Assisted Wireless Sales platforms processing \$21B in Sales Orders every year and ensured alignment with enterprise architecture goals.
- **Conceptualized a scalable Wireless Bulk Ordering Framework** to handle Sales and Service Transactions across ~1M lines/month, improving throughput and operational efficiency.
- **Led a new initiative on a "Wireless Order Tracker"** driving ideas from Dominos to enhance end-to-end visibility for field sales and customers from Wireless Order Submission through Shipment and Activation.
- **Led efforts to reduce technical debt**, resulting in a 90% elimination of backlog and improved system performance and customer experience.
- **Championed security enhancements**, including adaptive authentication, MiTek Face and Document Scans, TLO New Business Validations and Integrated Pega Case management for Transfer your service Transactions.
- **Fostered Data driven decisions** on tech debts, product roadmaps, feature usage & system performance.
- **Created operational policies**, procedures, standards, guidelines and best practices.
- **Championed technology innovations** through Hackathons, Ideathons and various other crowdsourcing activities.
- Coached and guided team growth and performance across Verizon and Vendor employees .

Key Accomplishments:

- Achieved a 90% reduction Tech Debt.
- Improved New Business Onboarding by 20% while reducing Fraud through improved security validations.
- Recognized with the "Next Horizon Award" for pioneering software delivery innovations.

Verizon – Sr. Manager | Wireline Presales CPQ Platform | Nov' 2015 – Aug'2022

- **Managed an engineering team of 18 employees** supporting over \$2B in annual sales bookings, delivering high-performance enhancements for Wireline Sales CPQ (Configure, Price and Quote) Platform.
- **Partnered with stakeholders to optimize sales operations and system simplification**, formulating business cases, project plans and delivery.
- **Led development of lightweight quoting tools for medium business sales**, driving an additional \$20M in annual bookings.
- **Led delivery on various projects and ideations** to improve overall sales and ordering experience and drive down cycle times
- **Drove technical & business insights via various metrics** on performance, feature usage, customer segmentation, usage patterns etc.
- **Managed Customer Escalations, Multiple RFPs and Product Briefings** for some of the Fortune 50 Clients.

Key Accomplishments:

- Earned **six consecutive Leading performance rating** YOY.
- **Received the Verizon Credo Award** (Company's Top Recognition) for outstanding contributions to sales system simplification.
- Hired, Mentored and Promoted multiple employees into various departments based on their career interests.

Verizon - Distinguished Member of Technical Staff | Sept' 2014 – Nov' 2015

- Developed enterprise-level architectures and collaborated with cross-functional teams to deliver strategic software solutions.
- Provided high-level designs and aligned system roadmaps with organizational goals.

Verizon, Broadridge, Infinite Computer Solutions | Developer Roles (Senior Developer, Programmer Analyst) | 2008 – 2014

- Designed and implemented Java/J2EE applications, APIs, and middleware solutions for mission-critical systems.
- Delivered scalable solutions for FiOS Order Management, Document Print Management, Campaign management, and Notification systems.

Technical Skills

- **Domain:** Full-Stack App Development, Microservices, Micro Frontends, Sales, Ordering and Service Business Domains, Pega/ServiceNow Integration, Workflow Management, Cloud Native Designs and Distributed Processing.
- **Cloud:** AWS, OCI, GCP.
- **Programming:** Java, Spring Boot, SQL, JSON, Ericsson Ordercare, Shell Scripts, JavaScript, Rest and SOAP APIs.
- **Middleware:** Kafka, RabbitMQ, Apigee, Redis, Elastic, Logstash, Google DialogFlow, Kore.AI, Google CCAI.
- **Databases:** Oracle, MongoDB, Cassandra, MYSQL, BigQuery, SQL Server.
- **Tools:** Jenkins, Docker, Kubernetes, Dynatrace, New Relic, Postman, JMeter, JIRA, Figma, GIT, SoapUI, Selenium, Robot.
- **Visualization:** Tableau, Grafana, Kibana.
